

Hospital Name		Location Code	
Asset Number		Department	
Asset Description		Purchase Date	
Model No. / Name		Warranty Expiry Date	
Serial No.		Supplier	
Manufacturer			

OBSERVATION :

1	Equipment is years old, purchase value is RM.....
2	/ Equipment is Working / Partially functioning / Not working / Inactive in storage / Damage
3	Equipment physical condition is poor / It is rusted
4	Equipment parts are missing
5	Its failure rate is high (support with failure rate data last 12 months)
6	Equipment safety test failed (safety test report to attached)
7	Conformance to IEC 60601-1 could not be established from the available label / documents
8	Equipment is locally manufactured and does not meet the IEC 60601-1 safety standards
9	Rated Voltage isV, does not conform to local standard 240V (not for BER record)
10	Equipment chasis is not grounded and does not meet the required electrical safety standard
11	Reliability and availability of spare parts source could not be established (only with document evidence)
12	Equipment is obsolete model. Ref. Supportive documents No.....
13	Product discontinued, spare parts are no longer available. Ref. Supportive documents no.....
14	Repair cost exceeds depreciated value. (For equipment NTW/more than ASHE life span)
15	Genuine spare parts are no longer available from supplier. Ref. Supportive documents no.....
16	A newer model has better features, efficiency and capacity
17	Equipment does not have the required statutory certificate (X-Ray, CT, Angio, Radiotherapy, etc)
18	Equipment is under warranty / Warranty expires by
19	Users are not satisfied with the performance of the equipment. Ref. Supportive documents no.....
20	Equipment is out of specifications even after repair
21	Third party maintenance no longer available. Ref. Supportive documents no.....
22	Technical support from vendor is poor / Job cannot be completed within required time
23	Equipment is not in use due to high running cost. Ref. Supportive documents no.....
24	Unreliable technical support due to change of manufacturer / suppliers. Ref. Support documents no....
25	Poor user maintenance
26	Failure of device shall cause disruption of service and/or patient treatment due to inadequate number of device(s) in the hospital
27	Damage, required extensive repair. It is uneconomical to regain the proper level of reliability (attach repair cost details)
28	High risk device as per FDA classification
29	Maintenance to be continued on a best effort basis until genuine spare parts can be sourced
